If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/715,686	Applicant(s) ONISHI ET AL.	
	Examiner Heather D. Gibbs	Art Unit 2625	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

1. Claims 29,31-42 are allowed.
2. The following is an examiner's statement of reasons for allowance: The Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine said prior art which teaches an assembly comprising a casing and transparent light conductor wherein the light conducting unit includes a first transparent member housed within the casing, and a second transparent member partially housed in the casing and partially projecting out of the casing, wherein the first transparent member is provided with a light receiving surface and light emitting surface opposite to the light receiving surface, at least one of the light receiving surface and the light emitting surface being provided with a convex portion, as taught by claim 29,39-42, including all of the features recited therein.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 27-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 21-22,24-25, are rejected under 35 U.S.C. 102(b) as being anticipated by Sawase et al (US 6,014,231).

Regarding claim 21, Sawase discloses an assembly (Fig 2) comprising a casing (i.e. element 2) and a transparent light conductor (cylindrical lens unit 4 is transparent light conductor), wherein the light conductor 4 includes a first portion housed in the casing at least partially (Fig 2, the lower part of the element 4 is partially located in the casing unit 2), and a second portion projecting out of the casing (the upper portion of the element 4 is considered a "second portion" as claimed, and it is clearly projected out of the casing unit 2 as shown below), wherein the first portion includes a light receiving surface (the lower portion of the element 4 is receiving the light from the light emitting element 7), wherein the second portion includes a light emitting surface for allowing light to exit (the upper portion of the element is emitting the light to the element 10), and wherein the light receiving surface is formed with a convex portion (the lower portion of the element is clearly formed with a convex portion).

For claim 22, Sawase teaches wherein the second portion is bent relative to the first portion (Fig 2).

Regarding claim 24, Sawase discloses wherein the light-emitting surface is formed with a plurality of indents each of which is provided with an inclined portion slanted relative to the light-receiving surface (recess 2f).

For claim 25, Sawase teaches wherein the light emitting surface is formed with a plurality of projections each having a corner at which a cutout is provided (light receiving portions 8a).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Heather D. Gibbs whose telephone number is 571-272-7404. The examiner can normally be reached on M-Thu 8AM-7PM.
